Re: 09/514,633 (US 5,514,907 and RE36,916)

Dear Examiner Clark,

Attached are the requested litigation search results.

Several patent litigation and news databases were searched using Dialog, Lexis-Nexis, Questel-Orbit, and PACER search systems.

Current litigation information was found.

Thank you for using EIC2800!

Paul Schulwitz

November 28, 2000, Tuesday

SECTION: FINANCIAL NEWS**DISTRIBUTION: TO BUSINESS AND TECHNOLOGY EDITORS****LENGTH:** 889 words**HEADLINE:** Simple Technology Expands Infringement Claims Against Dense-Pac Microsystems;
-Simple Technology Receives Reissue Patent For IC Tower Chip Stacking Technology -**DATELINE:** SANTA ANA, Calif., Nov. 28**BODY:**

Simple Technology, Inc., (Nasdaq: STEC), a leading manufacturer of solid state Flash storage and custom memory solutions, announced today that it will ask the United States District Court for the Central District of California to amend its patent infringement lawsuit against Dense-Pac Microsystems, Inc., to incorporate its newly granted chip stacking reissue patent. Simple Technology originally filed the lawsuit against Dense-Pac in September 1998 based upon its IC Tower(TM) stacking patent, U.S. Patent No. **5,514,907**, which was granted in May 1996. Last month, Simple Technology was granted a reissue patent, Re. 36,916, which expanded the company's claims to this innovative technology.

"We are extremely pleased that the U.S. Patent and Trademark Office has reconfirmed the validity of our patent rights and has broadened our exclusive rights to this significant technology," said Mark Moshayedi, the company's chief operating officer and inventor of the reissue patent. "Importantly, the grant of our reissue patent took into consideration all prior art that had been submitted to the court by Dense-Pac. We feel this greatly strengthens our position in the on-going litigation."

The IC Tower stacking technology is widely used throughout Simple Technology's product lines, including in its high-density memory and Flash card products, which find application in a variety of markets ranging from consumer products such as digital cameras, PDAs, MP3 players, to industrial applications such as telecommunications, networking, and embedded computing products. The use of stacking technology permits the company to offer economical, reliable, high-density memory and storage solutions as an alternative to a monolithic chip solution. In addition, the stacking technology permits the company to reach memory and storage densities which are not otherwise achievable through current technology.

"Although Dense-Pac is the immediate focus of our legal action, we now intend to begin a systematic assessment of companies practicing this method of chip stacking technology," said Manouch Moshayedi, the company's chief executive officer. "We believe that a number of companies, in addition to Dense-Pac, may be infringing our technology. We are firmly committed to protecting our intellectual property and we will vigorously pursue our full legal remedies. We would, however, be willing to license our chip stacking technology on a non-exclusive basis."

Simple Technology is seeking damages, including pre-judgment interest, totaling more than \$ 23 Million, in addition to injunctive relief against further patent infringement by Dense-Pac. Trial is presently set for March 2001.

About Simple Technology, Inc.

Simple Technology is a worldwide leader in the design, manufacture and marketing of Flash (solid-state and non-volatile memory), DRAM (Dynamic Random Access Memory), and SRAM (Static Random Access Memory) memory solutions. The company features a comprehensive line of more

than 2500 memory and storage products, and products that connect memory cards and hard drive upgrade kits to PCs. Simple Technology -- with a 10-year history of performance -- completed its initial public offering in September 2000.

Simple Technology products are used in high performance computing, networking and communications, consumer electronics and industrial applications. The company's patented IC Tower stacking technology, allows multiple memory and logic chips to be stacked together to provide increased capacity or enhanced functionality for memory or storage modules, cards and drives, without increasing the end-product footprint.

Safe Harbor Statement

This release may contain forward-looking statements that involve risks and uncertainties. The outcome of the litigation between Simple Technology and Dense-Pac Microsystems, Inc., is uncertain and results could vary from those predicted. If our IC Tower stacking reissue patent is found to be invalid, Simple Technology's ability to exclude competitors from making, using or selling the same or similar products to our IC Tower stacking products would cease. In addition, if Simple Technology is found to infringe valid patents of others, Simple Technology may be excluded from using the infringed technology without a license, which may not be available on commercially reasonable terms, if at all. Important factors which could cause actual results to differ materially from those in the forward-looking statement are detailed under "Risk Factors" in filings with the Securities and Exchange Commission made from time to time by Simple Technology, including its Registration Statement on Form S-1 declared effective on September 28, 2000. Simple Technology undertakes no obligation to release publicly any revisions to any forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

PR Newswire

September 24, 1998, Thursday

SECTION: Financial News**DISTRIBUTION:** TO BUSINESS AND TECHNOLOGY EDITORS**LENGTH:** 545 words**HEADLINE:** Simple Technology Files Patent Infringement Claim Against Dense-Pac Microsystems**DATELINE:** SANTA ANA, Calif., Sept. 24**BODY:**

Simple Technology, Inc. (STI) today announced that it has filed a patent infringement lawsuit against Dense-Pac Microsystems, Inc. (DPMI) Garden Grove, CA, for infringement of STI's patented chip stacking technology, U.S. Patent no. **5,514,907**, entitled "Apparatus for Stacking Semiconductor Chips." STI was granted the '907 patent in May 1996.

The claim, filed September 23, 1998, in the United States District Court for the Central District of California, Santa Ana Division, seeks damages as well as a permanent injunction against further DPMI sales. Specifically named as infringing are DPMI's M-Densus DRAM products numbers DPSC16MX8RY5, DPSD16MX8RY5, DPSD32MX4RKY5, and DPSD32MR72RW5-PC100. Customers who use these products purchased from DPMI may also be infringing the '907 patent. In addition, other DPMI parts may be added to the lawsuit.

"Simple Technology is an innovator in three-dimensional memory products and we will not allow our proprietary technology to be used without our permission," said Mark Moshayedi, COO of Simple Technology. "Dense-Pac has chosen to illegally incorporate our design into their products, so we must now turn to the legal system to vigorously protect our intellectual property rights."

STI's three-dimensional memory design allows industry standard packaged memory devices to be stacked together in the same footprint to act as a single device. Unlike multichip modules and die stacking, which require time consuming and expensive manufacturing techniques, STI's design uses standard manufacturing processes which allow each memory chip to be individually tested. The design enables a system to reach greater capacities with its existing number of memory slots, and it provides next-generation memory capacity while eliminating common obstacles often associated with new technologies like high cost, limited availability and long lead times.

About Simple Technology, Inc.

Founded in 1990, Simple Technology, Inc. is a worldwide technology leader in the memory, storage and communications marketplace, offering first-to-market products manufactured to ISO standards. The key to Simple Technology's success is its long-standing partnerships with industry-leading semiconductor manufacturers and OEM companies. The company offers a complete line of linear and ATA flash, SRAM, DRAM and communications products in a wide variety of form factors to meet the needs of its global customer base. Simple Technology markets its products through a worldwide network of distributors, retail chains and mail order including Ingram Micro, Pinacor, Fry's Electronics, Ritz Camera, and CDW. The company has headquarters in Santa Ana, California, with sales and manufacturing facilities worldwide. More information on Simple Technology is available at www.simpletech.com.
